

The polypropylene pool with built-in glass

The polypropylene pool with built-in glass is an innovative blend of durability and aesthetics. Crafted from high-quality polypropylene, this pool is not only resilient but also easy to maintain. Additionally, the integrated glass imparts a modern and luxurious appearance, creating a unique atmosphere of relaxation and elegance. Thanks to the innovative combination of materials, this pool not only provides the pleasure of water enjoyment but also serves as a stylish element in garden design.

Plug & Play

The product is ready for use, and its installation is very simple - just connect it to a power source.

Robust Steel Construction

The pool's framework is crafted from steel profiles, ensuring its durability.

Built-in Filtration

The product can be equipped with a filtration room along with all the necessary technology included in the set.

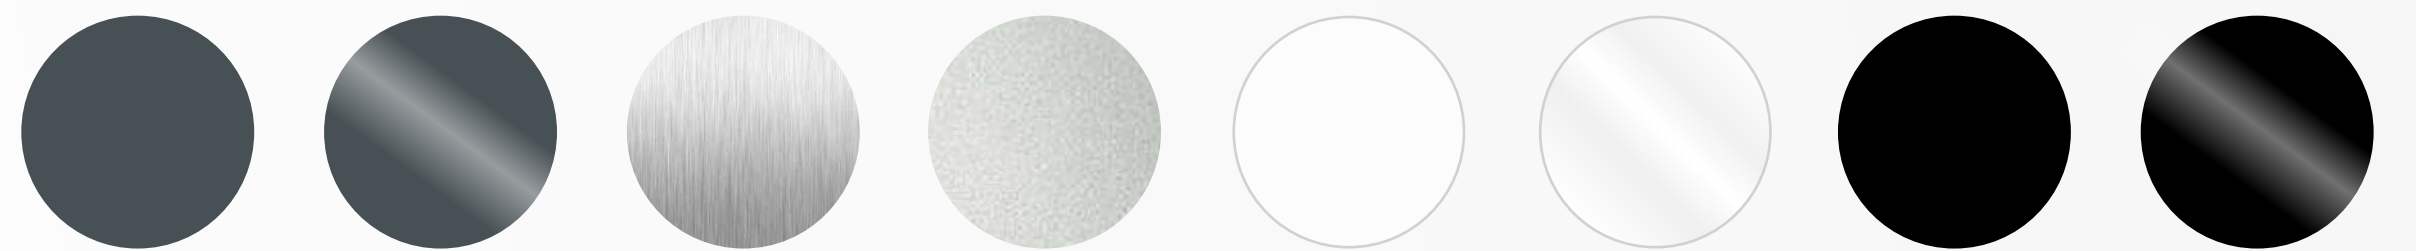

Ecological Insulation

The pool is insulated with 3 cm thick Styrodur, which minimizes heat loss.

Easy and Convenient Transport

The structure is equipped with 4 openings that facilitate the attachment of lifting straps for transporting the pool.

Cover made of Dibond

The pool cover is made of aluminum composite panels called Dibond. These panels are exceptionally resistant to changing weather conditions and UV radiation. They do not deform, have a long lifespan, are resistant to chemicals, and feature a perfectly smooth surface. Additionally, they exhibit excellent sound-absorbing properties. Available in various colors, they allow customization of the pool according to individual aesthetic preferences. The panel is characterized by high rigidity, is resistant to temperature changes, making it well-suited for both outdoor and indoor use.

Technical information

Weight above 2 tons

The weight of the pool, depending on its size, is a minimum of 2 tons.

Several Dimensions

For selection, A freestanding pool can have dimensions ranging from 6.5 x 3 x 1.4 m to 11.5 x 3.2 x 1.6 m. The maximum width (3.2 m) is determined by transportation safety.

Maximum Glass Width

The standard maximum width of the glass is 1.03 m. The window can be smaller, and it does not affect the pool's price.

Equipment Installation

The installation of equipment (skimmer, nozzles, lighting) is only possible on the technical room side.
